

To the FCC and everyone who reads this,

I urge everybody to support in favor of restoring and keeping Net Neutrality alive for all Americans so that all can access the internet without big companies hindering all my daily needs for it. They can turn websites they prefer into a paywall and not let others view content just from not accessing certain packages like a cable subscription.

Anyone who has the time must spread news of this and I personally favor keeping Net Neutrality and label the internet under Article II of the Telecommunications Act of 1934.

Thank you for listening.

Jasen Bussell
